Bloodborne: Forbidden Woods Expansion

During the day, the woods provide materials for building and cooking and are a source of food. But when darkness falls, different types of creatures begin to roam about and it's an entirely different breed of Hunter that moves among the trees. The Forbidden Woods are known as that for a reason, but to stop a growing threat, the Hunters are going in. The Forbidden Woods expansion for *Bloodborne: The Board Game* gives players two full campaigns and a side mission that they can attempt. Players can come across treasures that are found nowhere else, but they must be careful, as the woods conceal all new types of monsters and two new bosses lurking in the dense foliage. The twisting streets of Yharnam might seem quaint by comparison. Players can even embark on the side mission during their regular games of *Bloodborne: The Board Game* by simply adding the special side mission to their campaign.

KEY SELLING POINTS

- **New Campaigns** - Two all-new campaigns will challenge players in new ways. The included side mission can be used with the new campaigns or integrated into any from the core box.
- **New Foes** - Five new types of monsters and two new bosses lay in wait for the Hunters in the depths of the forest. They'll ambush the Hunters, poison them, and beguile them with illusions. Only a strong Hunter will see through their tricks.
- **New Map** - The crowded streets of Yharnam give way to dark woodlands, represented by new game tiles. Any thought of enjoying some peace and quiet outside of the city is gone as the woods close in around the Hunters.
