

# DULCE

1

EVERY PLAYER DRAWS AN IDENTICAL CARD

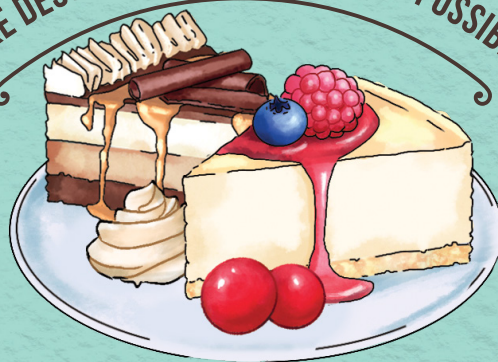

2

USE THAT CARD TO  
plant

3

MAKE DESSERTS AS EFFICIENTLY AS POSSIBLE!

## KEY POINTS

- Multi-use cards
- Strategic card placement
- Engine building

Competition is tough in the world of sweets. You'll need to plant your fields strategically with cacao, coffee, peanuts, and vanilla, and then use those beans efficiently to make the best confectionaries around! Using every resource is necessary to beat out your competition.

Each player has their own deck with beans on one side of each card and a factory on the other, as well as their own field in which to plant. Every round, one player draws a card and the others search their deck for the same card, and then everyone chooses their action simultaneously: to either plant, harvest, or build a new factory. Planting gains you new cacao, coffee, peanut, and vanilla resources, and harvesting allows you to use those resources in your factories.

Each confectionary made in your factories earns you one point, and at the end of 20 rounds, the player with the most points wins!
